REGISTRATION: 8:30-9:00AM  
**7.5 CPE CREDITS**

**COST: \$75.00**  
INCLUDES: CONTINENTAL  
BREAKFAST & LUNCH

### Program:

#### THE RISKY BUSINESS OF HEALTHCARE

This session will help you to understand what makes Enterprise Risk Management (ERM) more essential today than ever before due to the evolution of healthcare, as well as the history and requirements of risk management. You will also learn about the “big picture” approach to risk across your healthcare organization, real world examples of poor risk management that led to fraud cases in the healthcare industry, and steps to take to develop your ERM.

#### DEVELOPING CODING AND BILLING AUDIT PLANS

Learn how to protect your organization from fraud and abuse by formalizing self-audits of the coding and billing processes, develop a scoring mechanism to ensure consistent audits and secure Operational and Medical Leadership support for the internal audit process.

#### KEY RISKS TO CONSIDER WHILE SERVING ON A BOARD OF DIRECTORS

Dear CEO/ CFO /Officer, You work diligently every day to grow revenue and protect the assets of the Hospital, Physician Practice, and Entity. Are your assets protected? Key exposures that you should consider before and as you decide and while you serve as an officer on a Board of Directors.

#### PHYSICIAN PRACTICE LOSSES-ARE THEY ACCEPTABLE?

Are physician practice losses acceptable for hospital systems in the face of increased potential scrutiny from regulatory agencies? Does physician compensation align itself with physician practice results? What you need to know.

#### CLIMBING THE POPULATION HEALTH MOUNTAIN

Succeeding in a value based environment requires a winning population health strategy. Getting there is like climbing a mountain; requiring a solid foundation, hard work, and a stepwise approach to reach the summit.

#### GET ON THE PHARMACY OFFENSIVE: WRAP UP THE RISK AND SCORE!

Both pharmacy operations and programs such as 340B have many cost-savings and revenue-generating opportunities. While supporting your pharmacy’s defensive team (which is consumed by distracting and unrelenting regulatory requirements and changes), learn how to be proactive in addressing preventable risk to prepare for the surveys and compliance audits - all while seizing your opportunities. If anybody scores, it is normally the offensive team.

#### EMERGENCY PREPAREDNESS STANDARDS - ONE YEAR LATER: READY FOR RESILIENCY REVIEW?

Briefly revisit the CMS Final Rule regarding the Emergency Preparedness Standards implemented in 2017; walk through requirements for annual updates necessary for your facility to remain in compliance in 2018/2019 and beyond.
